

Day - 106

OOPs - 5

* Types of Inheritance:

⇒ Single Inheritance:

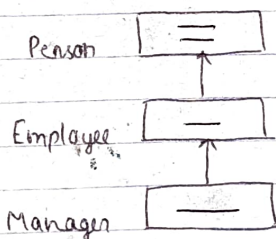

⇒ When any class inherit the properties of its parent class is called single inheritance.

⇒ In the inheritance, constructor of Parent class called first.

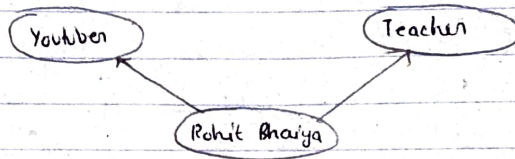

* Multilevel Inheritance:

⇒ When any class inheriting another class & that class also inheriting some another class is called multilevel inheritance.

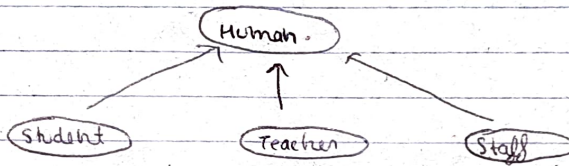

* Multiple Inheritance:

⇒ When a class inheriting multiple classes.

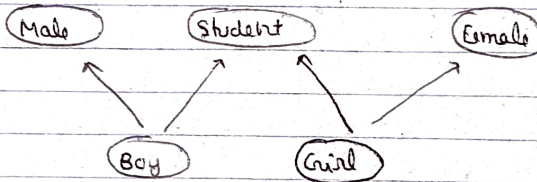

* Hierarchical Inheritance:

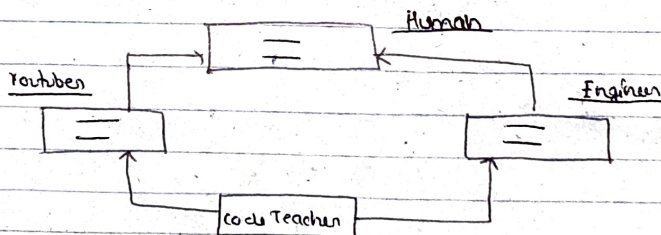

⇒ When we have one base class & many childrens.

* Hybrid Inheritance:

⇒ When we mix up diff. types of inheritance.

* Multipath Inheritance:

⇒ In this, a class get ~~the~~ data from multiple path.
